DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wittmann (5,667,737) in view of Sugiyama '010. Wittmann '737 discloses an article of footwear comprising a shell and a leg piece, and featuring, at least in selected portions thereof other than the sole, a composite structure formed of two layers that are made of synthetic materials having different mechanical properties and are provided with mutually interfacing layers that remain inseparably adhering together. See figures 2-4 embodiments and column 3, lines 44-47. Wittmann '737 discloses that the different synthetic resin materials are interconnected in overlapping transition areas shaped to fit each other i.e. having complementary configurations. Wittmann '737 does not appear to teach the shape of the interconnected overlapping transition areas having ribs intersecting each other so as to form a sort of truss-like pattern. Sugiyama '010 discloses a footwear assembly made up of a hard elastic layer and a soft elastic layer having intersecting complementary ribs forming a truss-like pattern on the overlapping transition areas for better bonding of the two layers. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to shape

the transition areas of Wittmann '737 with ribs as taught by Sugiyama '010 for better bonding of the two layers.

With respect to claim 2, see column 4, lines 1-8.

With respect to claims 5 and 6, see column 3, lines 44-58.

With respect to claims 9 and 10, see column 2, lines 12-17.

Response to Arguments

3. Applicant's arguments filed January 13, 2006 have been fully considered but they are not persuasive.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Contrary to applicant's arguments since the modified shell layers of Wittmann '737 provide an assemblage of members forming a rigid framework they do form a truss-like pattern.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
